

Case 2:

- ① Web Hosting Server
- ② Database Server
- ③ Cables / Internet / Connection
- ④ Room to place all of this + A/c

All of these you have to have before even a customer.

Ans 3: Paying only what the Users → Advantage of AWS.

- ① You can deploy in different geographical locations.
  - ↳ It can reduce the distance b/w Browser and Server
  - ↳ If one server breaks, other will pickup
  - ↳
